

# Mark Anthony T. Samonte

Software & Automation Engineer

Philippines | mat.samonte9@gmail.com | +63 929 181 5435 | Portfolio: [markanthonysamonte.dev](https://markanthonysamonte.dev) | GitHub: [matsamonte9](https://github.com/matsamonte9) | LinkedIn: [mark-anthony-samonte](https://www.linkedin.com/in/mark-anthony-samonte)

## SUMMARY

Full-stack developer and systems architect who owns automation, integration, and platform access end-to-end for clients, working directly with them from scoping through delivery across n8n, Make.com, Zapier, GoHighLevel, Respond.io, and Botcake.io.

## EDUCATION

### Nueva Ecija University of Science and Technology (NEUST)

Bachelor of Science in Information Technology — Web Systems Technology

Cabanatuan, Philippines

Aug 2021 – Jun 2025

## EXPERIENCE

### Zelix Labs (Full-Time)

Jan 2026 – Present

Software & Automation Engineer — Remote (Singapore-based)

- Work directly with clients to scope requirements, owning the automation architecture end-to-end across n8n, Make.com, Zapier, GoHighLevel, and Respond.io — plan, build, ship, and communicate with the client at every stage.
- Also build full-stack web applications for clients on the team's stack — Claude Code, Supabase, and Vercel.
- Track tasks, timelines, and project plans in Notion for both internal work and client deliverables.

### Freelancing (Beyond Horizon)

Independent Contractor — Full Stack Developer & Systems Architect

#### Richbean Coffee Shop — POS, Inventory & Ordering System

Philippines

- Built a POS, inventory, and ordering system for a coffee shop, giving the owner one system for order-taking, stock levels, and daily operations instead of manual tracking.

#### CFS Jewelry Shop — Internal Inventory Management System

Philippines

- Built internal custom software for gram-based gold inventory tracking, giving real-time visibility into available stock across intake, sales, and personal withdrawals so nothing is mistakenly counted as on hand. Tools: React, Node.js, Supabase/PostgreSQL, Tailwind CSS.

#### Family Retail Business — POS, Inventory & Automation

Palayan, Philippines

- Built an RBAC-secured POS and inventory system with n8n automation handling cross-app workflows, scheduled reporting, and webhook-driven Slack/Discord notifications, plus a Claude API chatbot for natural-language inventory and order queries. Tools: n8n, Claude API, Slack/Discord webhooks.

## Internship

### Prokora Network Solutions

Manila, Philippines

Frontend Developer Intern

Jan 2025 – Jun 2025

- Developed UI features and a dashboard for a sales tracking system covering employee, customer, project, and lead management — replacing manual tracking with production-deployed features.

## Personal Projects

### AI-Powered Multimedia Generation Platform

Team Lead — System Architect & AI Workflow Orchestrator

- Leading development of a multimedia AI generation platform, onboarding ~30 beta testers at launch; designed the microservice architecture (frontend, backend, AI CoPilot), orchestrated media-generation workflows, and defined API contracts between services. Tools: ComfyUI, Stable Diffusion, Flux, n8n.

### Job Application Tracker with AI & Calendar Sync

Solo Developer

- Built an end-to-end job tracker integrating Google Calendar for interview scheduling, Claude API for resume tailoring, and automated workflows for follow-up reminders and application status updates. Tools: n8n, Google Calendar API, Claude API.

### Aztrid — Pasabuy Ordering & Distribution App

Solo Developer

- Built a lightweight ordering app for pasabuy runs — participants browse items and order, while an admin view sorts and manages distribution of second-choice items during warehouse-sale runs. Tools: Claude Code.

## SKILLS

**Website, Hosting & Backend:** Vercel, Docker, GitHub Actions, CI/CD pipelines, Cloudflare R2, Node.js, Express, RESTful APIs, WebSockets, BullMQ

**Frontend, Testing & Languages:** JavaScript, TypeScript, Next.js, React, Tailwind CSS, TanStack Query, Vitest, Postman

**Automation & Integration:** n8n, Make.com, Zapier, GoHighLevel, Respond.io, Botcake.io, Claude / Anthropic API, Webhooks

**Architecture & Access Control:** PostgreSQL, MongoDB, Supabase, Redis, Notion (system of record), schema & relational design, RBAC, OAuth, JWT
